### **About Curis, Inc.**

Curis is an oncology-focused drug development company seeking to develop novel drug candidates for the treatment of human cancers. Curis is seeking to further the development of its pipeline of proprietary targeted cancer drug candidates, including CUDC-907, a dual HDAC and PI3K inhibitor and CUDC-427, a small molecule antagonist of IAP proteins. Erivedge® is our most advanced asset and the first and only FDA-approved medicine for the treatment of advanced basal cell carcinoma and is being commercialized and developed by Roche and Genentech, a member of the Roche Group, under a collaboration agreement between Curis and Genentech. Curis-discovered HSP90 inhibitor, Debio 0932, is being studied in patients with advanced lung and kidney cancers by its partner Debiopharm.
